

ONTARIO ENERGY BOARD NOTICE

The Ontario Energy Board is holding a hearing to consider what mechanisms may be used to recover the costs of expanding natural gas service to Ontario communities that are currently not served.

Learn more. Have your say.

The Ontario Energy Board is commencing a hearing on its own motion to consider what mechanisms may be used to recover the costs of expanding natural gas service to Ontario communities that do not currently have access to natural gas.

In July 2015, Union Gas Limited filed an application (EB-2015-0179) to expand natural gas service to certain rural and remote communities. That application included a proposal to have existing Union Gas Limited customers pay a portion of the costs to connect new customers. The Ontario Energy Board has determined that the requests made by Union Gas Limited in that application raise issues that may be common to any entity that wishes to provide natural gas service to communities that do not currently have access to natural gas service. The Ontario Energy Board will therefore address these issues through a generic proceeding.

The Ontario Energy Board will put the hearing of Union Gas Limited's application (EB-2015-0179) on hold until the generic hearing is complete.

In the generic proceeding, the Ontario Energy Board will consider possible alternative ratemaking frameworks to provide natural gas service to Ontario communities that do not currently have access to natural gas. The OEB plans to seek input from intervenors on exactly what the issues should be. However, broadly speaking the OEB intends to review the following issues:

1. Should the OEB implement new ratemaking mechanisms including changes to current economic tests to encourage utilities to expand natural gas distribution service to new communities? If so, what should these new mechanisms be?
2. Should the OEB consider imposing conditions or making other changes to Municipal Franchise Agreements and Certificates of Public Convenience and Necessity to reduce barriers to natural gas expansion?
3. Does the OEB have the authority to require the ratepayers of one utility to subsidize the costs of another utility to expand into new communities? If so, under what circumstances (if any) would this be appropriate?

THE ONTARIO ENERGY BOARD IS HOLDING A PUBLIC HEARING

The Ontario Energy Board (OEB) will hold a public hearing to consider the kind of cost recovery mechanisms that may be appropriate for rural and remote community expansion projects in Ontario. We will hear arguments from parties involved in the process and will decide what, if any, new mechanisms are appropriate.

The OEB will adopt into the record of this proceeding, all evidence filed in EB-2015-0179 that is relevant to the issues to be determined for the generic hearing. The OEB will provide an opportunity for the filing of further evidence in subsequent procedural orders.

The OEB will deem the intervenors in the EB-2015-0179 case to be intervenors in this generic hearing and grants to any such intervenors the same cost eligibility status as was granted in EB-2015-0179.

The OEB is an independent and impartial public agency. We make decisions that serve the public interest. Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.

Re: Ontario Energy Board Generic Proceeding EB-2016-004

Dear Ms. Walli,

Regarding the Ontario Energy Board's Generic Proceeding EB-2016-004, the Eastern Ontario Wardens' Caucus would like to provide the following submission as a letter of comment.

As an organization representing the interests of municipal taxpayers in rural Eastern Ontario, the EOWC supports the initial application from Union Gas (EB-2015-0179) to expand natural gas service to rural and remote communities. Beyond that, however, the EOWC also supports any similar efforts from other entities, such as Enbridge Gas, that wish to provide natural gas services to rural and remote communities that do not currently have access to such services.

The expansion of the infrastructure required to provide natural gas to rural communities that would otherwise not receive this service would allow for significant economic benefits for every sector: residential, commercial and industrial. Natural gas is the most reliable, efficient, and economical form of energy, but due to the dispersed nature of our population – coupled with our geography and geology – many areas remain underserved or are simply not serviced at all.

As the economic development of our region is a priority issue, the expansion of the natural gas network is of great importance to everyone who lives and does business in rural Eastern Ontario. If certain conditions were put into place, such as those being considered by the Ontario Energy Board, it may become financially feasible to extend natural gas to the EOWC region.

The EOWC is an incorporated non-profit organization comprised of the elected Wardens of the 13 County Councils in rural Eastern Ontario, stretching from Northumberland in the west to the Quebec border in the east, with a combined population of 750,000. In closing, on behalf of the EOWC, I strongly encourage the Board to consider and approve any measures raised in the Generic Proceeding EB-2016-004 that may allow for the provision of natural gas in our region.

Best regards,

Peter Emon
